

Fabric Upholstery

Satisfaction, delivered.
Exceeding expectations is so much more rewarding than simply meeting them. Take our expert delivery service for example. We don't just deliver to your door, we'll place your furniture exactly where you want it, carefully unpack it for your inspection, and then, when we're sure you're delighted with everything, we'll take the packaging away with us.

Expert advice to help you choose.
Every one of our furniture ranges tells a story - and our sales assistants are fully trained so they can share them with you. All of our staff have been to visit our manufacturers, so if you want to know how an item has been produced or how best to look after it, just ask.

We recycle, you relax
If your purchase is to replace furniture you no longer wish to keep, we can help you with the removal and responsible disposal of the unwanted items. Just ask in store for details.

0% finance? Fine.
Purchase from one of our showrooms and our 0% finance option means you can spread the cost as easily as you can spread out on one of our invitingly oversized sofas. Terms and conditions apply - just ask in store for more details.

Hear it from our happy customers
We're very proud of our furniture and service, but then we are biased. What really delights us is that we receive so many positive comments from people who aren't. To share their stories, visit www.barkerandstonehouse.co.uk and read our customer testimonials.

A guaranteed commitment to quality.
Real quality isn't just apparent in the subtle sheen of the finest nappa leather or the solid embrace of expert craftsmanship. It's apparent years later, when the beauty, comfort and practicality of your B&S furniture are all the more appreciated because they are the last. We're proud of this quality. That's why we offer a 2 year guarantee on all our furniture, which can be extended to 5 years should you wish.

Passionate about furniture for over 65 years.
We've been getting a warm glow out of bringing you the finest quality furniture since 1946. Today, while you'll find the cutting edge of 21st-century design alongside our timeless classics, our standard of service and attention to detail has remained constant throughout. We hope you'll enjoy that same glow of satisfaction from all your B&S purchases, now and for years to come.

Doing good with wood.
We're pleased to be a founding member of Trees4Trees, a non-profit organisation established in Indonesia to empower local communities through an ongoing reforestation and education programme. Already, over half a million saplings have been planted as a result of the initiative - good for the planet, the growers and the future of sustainable furniture.

IS YOUR HOUSE A BARKER & STONEHOUSE?

Helping you choose

It is important when choosing your furniture you know what to expect, as the features and benefits of different materials affect the look and durability of furniture. To help further with your understanding of what to expect we have produced some basic information on types of materials and interiors.

Upholstery furniture always starts with the frame which generally dictates the final look of the furniture, frames can be constructed using various timbers and particle board the more durable being hardwood frames that are screwed glued and dowelled.

The sit and feel of upholstery furniture can depend on the type of suspension units that can come in the form of highly resilient elasticated webbing, zig zag springs, or coil springs. Interiors also affect the sit and maintenance of furniture, the main types of interiors available are feather filled, polyester fibre filled and foam core interiors or a combination of these fillings. Foam core interiors generally offer maximum resistance to settlement whereas feather and fibre interiors offer less resilience and require greater maintenance.

The final part of upholstery make up is the chosen fabric, this not only affects the aesthetic look of the furniture but also has a bearing on the durability of the furniture.

MATERIALS

Calico - A tightly woven cotton type fabric, either plain or with an all over print.

Chenille - A thick soft tufty yarn susceptible to pile crushing and shading.

Damask - A glossy jacquard fabric, usually made from linen, cotton, rayon, silk or blends. The patterns are flat and reversible and the fabric tends to be heavy.

Microfibre - Ultra-fine manufactured fibres using microfibre technology producing a gentle fabric with superior softness.

Nap - A fuzzy, fur like feel created when fibre ends extend from the basic fabric structure to the fabric surface.

Pill - A tangled ball of fibres that appear on the surface of a fabric as a result of wear or friction on the surface of the fabric, some fabrics are more prone to 'pilling' and is a natural feature.

Velour/Velvet - Velvet and velour are luxurious fabrics, but as they have a raised surface texture they can be prone to shading and creasing with pile pressure.

Please note that due to the sumptuous nature of chenille and velvet, crushing may be apparent from new and will change with use.

INTERIORS

Interiors are produced to offer maximum comfort for the style of your chosen furniture.

It is common that interiors will lose at least 10% of their density in the first 3 months, increasing to 20-30% over time. To prolong the life span of interiors where possible cushions should be rotated or seating positions changed regularly.

Where fixed seat models are chosen, particular care is needed to avoid 'side sitting' (lying or sitting on their edge of interiors) as this can cause excessive dipping of the interior.

Daily maintaining is required by vigorously plumping cushions to offer maximum performance, particularly fibre and feather interiors.

Caring for your furniture

Soft upholstered furniture gets just as dusty and dirty as cabinet furniture - the difference is you can't always see it. Upholstery should be viewed in a similar way to clothing, ie. it needs regular cleaning, ideally by a reputable cleaning company.

REGULAR AND EASY CARE MAINTENANCE

- Try to keep pets off the upholstery and be careful of sharp objects such as belt buckles, toys and watch straps snagging the fabric. If snags do occur, carefully cut off the loose ends with scissors or tuck back in - do not pull them under any circumstances.
 - Discourage lively children from using your new suite as a climbing frame if you want to prolong its life span.
 - Use protective arm caps where possible as this is the area most likely to show wear.
 - Reversible seat and back cushions should be turned regularly and plumped up to maintain their shape. As a guide these cushions should be attended to at least on a weekly basis, but may require daily attention dependant upon type of filling and usage.
 - Upholstery can be lightly vacuumed or gently brushed to remove dust.
 - Strong sunlight can cause fabrics to fade.
 - Sitting on the front edges of cushions or on the arms of furniture may cause distortion or damage.
 - Wood or decorative facings require minimal maintenance, and should be occasionally wiped with a damp cloth to remove dust.
 - Do not use spray polishes or solvent cleaners, as these can have a damaging effect on both the facings and adjoining fabric.
 - Fringes and ruching should be treated with care, especially when vacuuming.
 - Caster cups are useful to reduce indentations on carpets and wood flooring.
- ### Stop spills becoming stains
- To avoid damaging your upholstery, if you spill something on it, simply act quickly and mop up excess liquid with a clean white cloth.
 - Do not rub and do not use detergents.

Cleaning

- Vacuum or brush clean your upholstery weekly to remove accumulated dirt, which can cause colours to look faded or dull, but take care if vacuuming delicate fringe and braid details.
- Plump the cushions at the end of every day of use, particularly those filled with feather or fibre, and also smooth out the surface to prevent permanent creases being formed. Where you can, turn the cushions regularly to equalise wear.
- Always follow your manufacturer's cleaning and care label instructions. Clean your upholstery regularly and before soiling becomes ingrained.
- Clean all parts of a suite together as slight colour changes can sometimes occur.

Motion furniture

- Motion furniture has many different designs and functions, and it is very important that the manufacturer's operating and care instructions are correctly followed.

Loose cover upholstery

- Loose covers should be cleaned regularly in accordance with the manufacturer's instructions.
- Some slight shrinkage may arise on initial cleaning, but sufficient tolerance will have allowed for this.
- When removing and particularly when replacing loose covers, always take care with the carcass and cushion cover zips. Your covers are tailored to snugly fit the carcass, therefore identify the shapes prior to fitting. If washed, replace the covers when just slightly damp to ensure a better fit and less shrinkage or creasing. Do not replace covers if they are wet, as this could damage other materials.
- Allow the covers to settle on the furniture for a day or so.
- Ironing should not be necessary, but if this is required, iron the covers on the furniture using a damp cloth.
