- Available in a range of leathers
- Regularly plump all cushions to maintain performance. Please refer to the care and commitment leaflet for further details.

Outback leather is a full aniline hide that has been dyed and hand finished with wire brushes. This process creates a unique look with each piece varying in distressing and shading enhancing its character. This range is available in many different hides, each with unique characteristics including scars, grain variation and other markings. It is normal for leather to show signs of creasing and stretching and for interiors to lose density from use.

Leather Tub Chair
